Creek Banks and Coulee Escarpments Remain Unsafe

Medicine Hat – Coulee escarpments and creek banks remain unsafe after the recent flood and heavy rainfalls, and residents are urged to stay clear.

In particular, residents should use extreme caution in the coulee area behind ADM Mills and below Craven Place S.E.

Assessments and repairs need to be completed before these areas are considered safe to access.

Please watch for barriers and posted signage, and keep your distance from the edges of all creeks and coulees.
