Finlay Bridge 2010 – Approach Paving

Medicine Hat – The temporary asphalt approaches installed to ensure the opening of the Finlay Bridge in January 2010 are being replaced with permanent approaches. The new approaches will improve the transitions from the road to the bridge.

The approaches of Finlay Bridge are being paved on Monday July 26 and Tuesday July 27. The paving requires the closure of the bridge to vehicle traffic for the duration of the paving.

Pedestrians are still permitted to use the bridge during this work.

The City greatly appreciates motorists' patience and recommends the use of alternate routes during the bridge closure.
