

**For Immediate Release**  
**June 4, 2010**

## **Kensington Foot Bridge Closure**

**Medicine Hat** –The Municipal Works Department at the City of Medicine Hat recently evaluated the condition of the Kensington foot bridge over Ajax coulee. The evaluation determined that the bridge foundations are being eroded and pose a significant risk to the stability and safety of the bridge.

Effective 4 p.m. today the Kensington foot bridge and areas below the bridge are closed to public access. Residents who use this bridge are urged to find alternative routes.

During the closure, staff will assess the condition of the Kensington foot bridge and develop a plan to implement corrective measures.
